- 1. If the Authorization is being requested by the entity holding the information, this entity is the Requestor.
- 2. This form may **not** be used to release both psychotherapy notes and other types of health information (see 45 CFR"164.508 (b)(3)(ii). If this form is being used to authorize the release of psychiatric health information, a separate form must be used to authorize release of any other health information. An authorization for use or disclosure of HIV test results must **specifically** state that it authorizes the use or disclosure of HIV test results and must be signed by a witness.

- 3. If mental health information covered by Lanterman-Petris-Short Act is requested to be released to a third party by the patient, the physician, licensed psychologist, social worker with a master's degree in social work or marriage and family therapist, who is in charge of the patient must approve the release. If the release is not approved, the reasons therefore should be documented. The patient could most likely legally obtain a copy of the record himself or herself and then provide the records to the third party.
- 4. The statement "at the request of the individual" is a sufficient description of the purpose when the individual initiates the authorization and does not, or elects not to, provide a statement of the purpose.
- 5. If authorization is for the use or disclosure of protected health information for research, including the creation and maintenance of a research database or repository, the statement "end of research study", "None", or similar language is sufficient.
- 6. Under HIPAA, the individual must be provided with a copy of the authorization when it has been requested by a covered entity for its own uses and disclosures (see 45 CFR"164.508 (d)(1), (e) (2)).
- 7. If any of the exceptions to this statement, as recognized by HIPAA apply, then this statement must be changed to describe the consequences to the individual of a refusal to sign the authorization when that covered entity can condition treatment, health plan enrollment, or benefit eligibility on the failure to obtain such authorization. A covered entity is permitted to condition treatment, health plan enrollment or benefit eligibility on the provision of an authorization as follows: (i) to conduct research-related treatment, (ii) to obtain information in connection with a health plan's eligibility or enrollment determinations relating to the individual or for its underwriting or risk rating determinations. Under no circumstances, however, may an individual be required to authorize the disclosure of psychotherapy notes.
- 8. The requestor is to complete this section of the form.
